Segue CRM: Loan Broking Module

User Guide & Step-by-Step Practical Manual

Application URL	https://crm-segueit.vercel.app
Who it's for	Principal Brokers, Brokers (credit representatives), Loan Processors and Commissions Administrators
Rules it supports	National Consumer Credit Protection Act 2009 (NCCP Act) and Regulations, ASIC RG 273 (Mortgage brokers: Best interests duty), APRA's serviceability buffer guidance

> **Important**
> The system helps you follow these rules, but your credit licence remains responsible for compliance. Check your processes against current ASIC guidance.

1. Introduction to the Loan Broking Module

The Loan Broking module is built for Australian mortgage and finance brokers. It takes a loan from the first enquiry through the fact find, preliminary assessment, lodgement with a lender, approval and settlement, and then tracks the commission it earns.

The module records the steps the NCCP Act requires at the right time:

- **Before credit assistance:** the credit guide, privacy consent and (when the client pays you a fee) a credit quote.
- **Before lodging:** the preliminary assessment, the Best Interests Duty (BID) record and the credit proposal disclosure.
- **Afterwards:** it keeps those records for 7 years.

It also calculates the LVR, flags likely Lenders Mortgage Insurance (LMI), works out repayments at the assessment rate, and creates commission entries on settlement and clawbacks on early discharge.

Roles in your broking practice

Each person's profile (Setup → Users) decides what they can see and do:

Profile	What they can do
Principal Broker	Sees and edits every loan application, fact find, lender, client and commission. Can lodge with lenders (*Submit to Lender*), manage commissions (*Manage Commissions*), invite clients to the portal, import, export and transfer records. Can correct the stage of a Settled or Declined application.

Profile	What they can do
Broker	Creates and works their own applications and fact finds, writes the BID record and lodges with lenders (*Submit to Lender*). Reads the lender panel and the commission on their own loans, but can't record commission. Can invite their clients to the portal.
Loan Processor	Sees and edits every application and fact find to prepare and track them through to settlement. Can't create applications, lodge with a lender or see commission.
Commissions Administrator	Records and reconciles commission (*Manage Commissions*), maintains lenders and reads every application.
System Administrator	The person who created the workspace. Everything, plus Setup.

A broker or processor named on an application automatically gets access to it, even if someone else owns it.

---

2. Getting Started & Interface Tour

Step 1: Sign in

1. Go to **https://crm-segueit.vercel.app** in a current browser (Chrome, Edge, Safari or Firefox).
2. Enter your **Work e-mail** and **Password**, then click **Sign in**.
3. The first time you sign in, you set up **two-step verification** with an authenticator app (such as Microsoft or Google Authenticator). After that you enter the 6-digit code each time.

New colleagues get an e-mail invitation to set their password. If you forget yours, use **Forgot your password?**

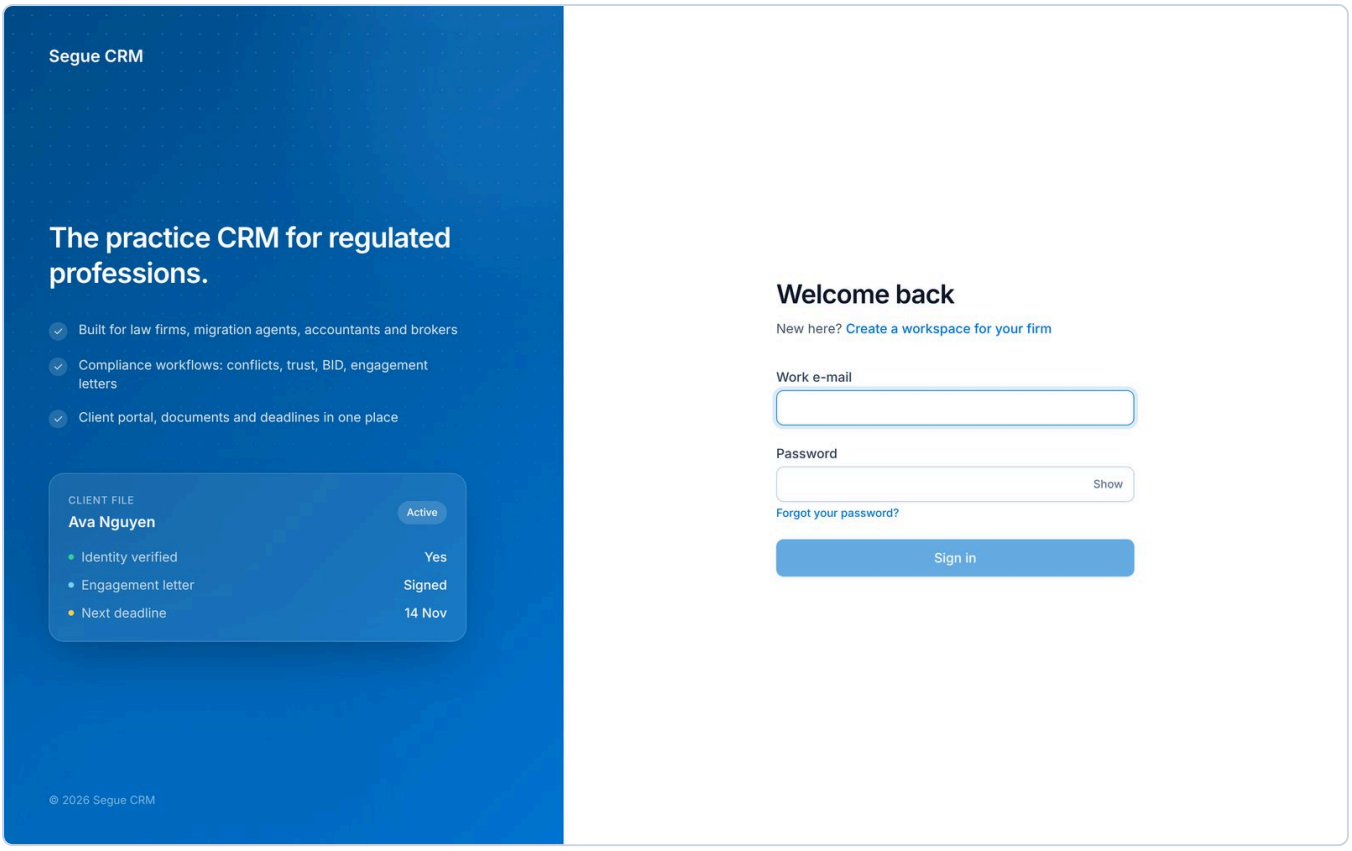

Figure 1: The sign-in page.

Step 2: Your workspace

Your workspace was set up for loan broking when it was created, so it opens straight into the **Loan Broking** app. The app switcher at the top of the sidebar also offers **Analytics** (reports and dashboards). There's no separate login or switching between professions.

Step 3: The sidebar

The sidebar on the left lists every part of the module:

- **Home:** shortcuts, your pipeline, your tasks, recent records and the Broking Dashboard charts.
- **Enquiries:** new leads, with the loan purpose and amount they asked about. Convert an enquiry to create the client.
- **Clients:** borrowers, with ID verification and residency details.
- **Loan Applications:** every loan file from enquiry to settlement.
- **Lenders:** your lender panel, with commission rates, clawback terms and BDM contacts.
- **Commissions:** the commission ledger (upfront, trail and clawback).
- **Organisations:** companies, such as a borrower's business or employer.
- **Client Requests:** questions and requests clients send from the client portal.
- **Calendar, Reports and Dashboards.**
- **Setup** (at the bottom, for administrators): users, profiles and Practice Settings.

Fact finds don't have their own tab: they live inside each loan application (see section 5). Collapse the sidebar to icons with the arrow at its top or with **Ctrl+B**. Every page except Home has a **Back** button

at the top left.

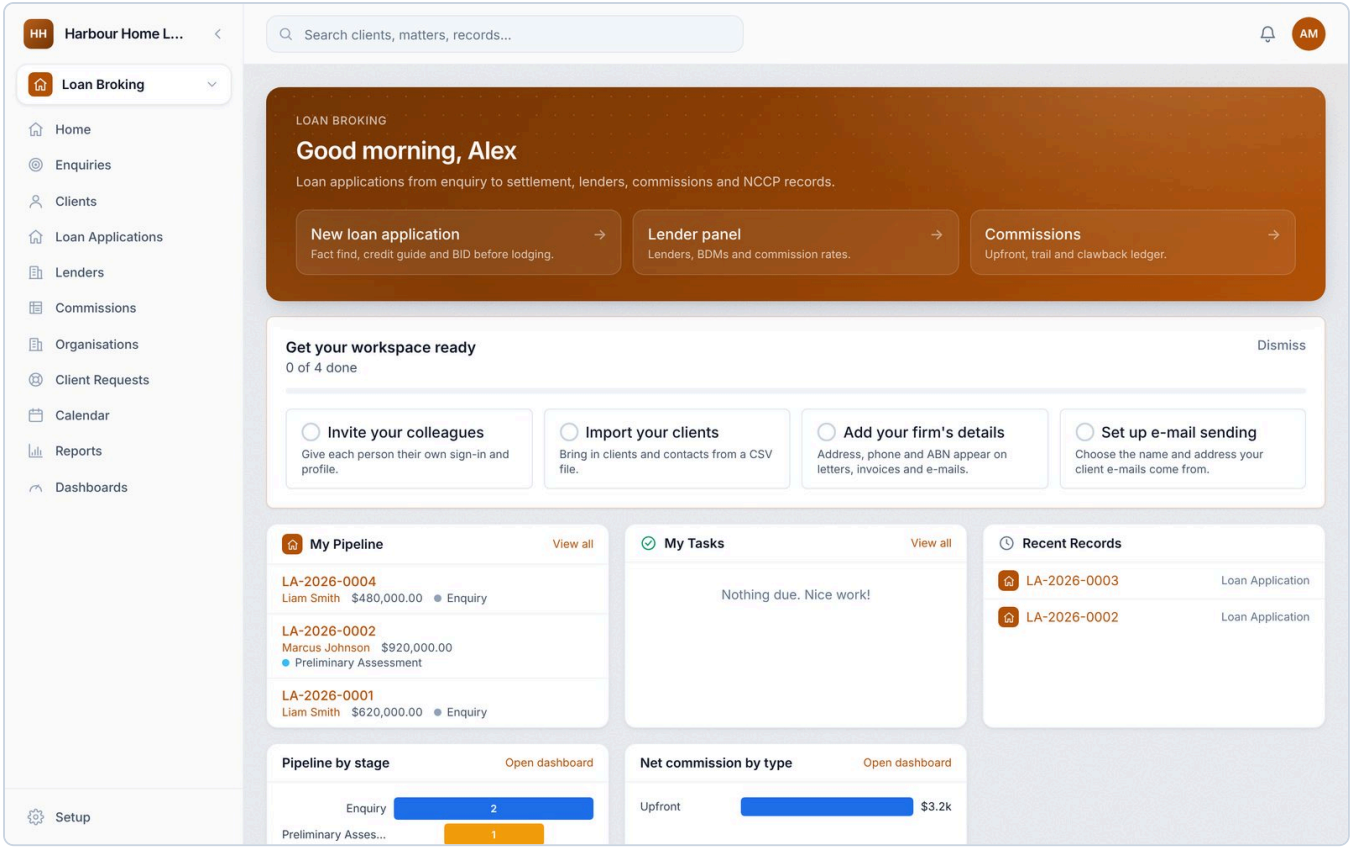

Figure 2: Home, with shortcuts, My Pipeline, My Tasks, Recent Records and the dashboard charts.

The shortcuts at the top are **New loan application**, **Lender panel** and **Commissions**. Administrators also see **Get your workspace ready**, a checklist to invite colleagues, import clients, add the firm's details and set up e-mail.

---

3. Managing Loan Applications

A loan application is one borrowing deal. It brings together:

- **People:** the borrower and co-borrower, the broker and the processor.
- **The loan:** purpose, amount, security property and its value, LVR, lender, product, rate and term.
- **Compliance:** the NCCP dates and the BID record.
- **Key dates:** lodgement, approval expiry, settlement and rate review.
- **Linked records:** its fact finds and commissions.

Viewing your pipeline

Open **Loan Applications**. The buttons beside the list's search box switch between:

- **Table view:** Application Number, Primary Borrower, Purpose, Loan Amount, Lender, Stage and Broker. Click a column heading to sort it.
- **Board view (Kanban):** one column per stage, with the number of applications and the total loan amount in each. Drag a card to move it to another stage; the same rules apply as when you

change the stage on the record.

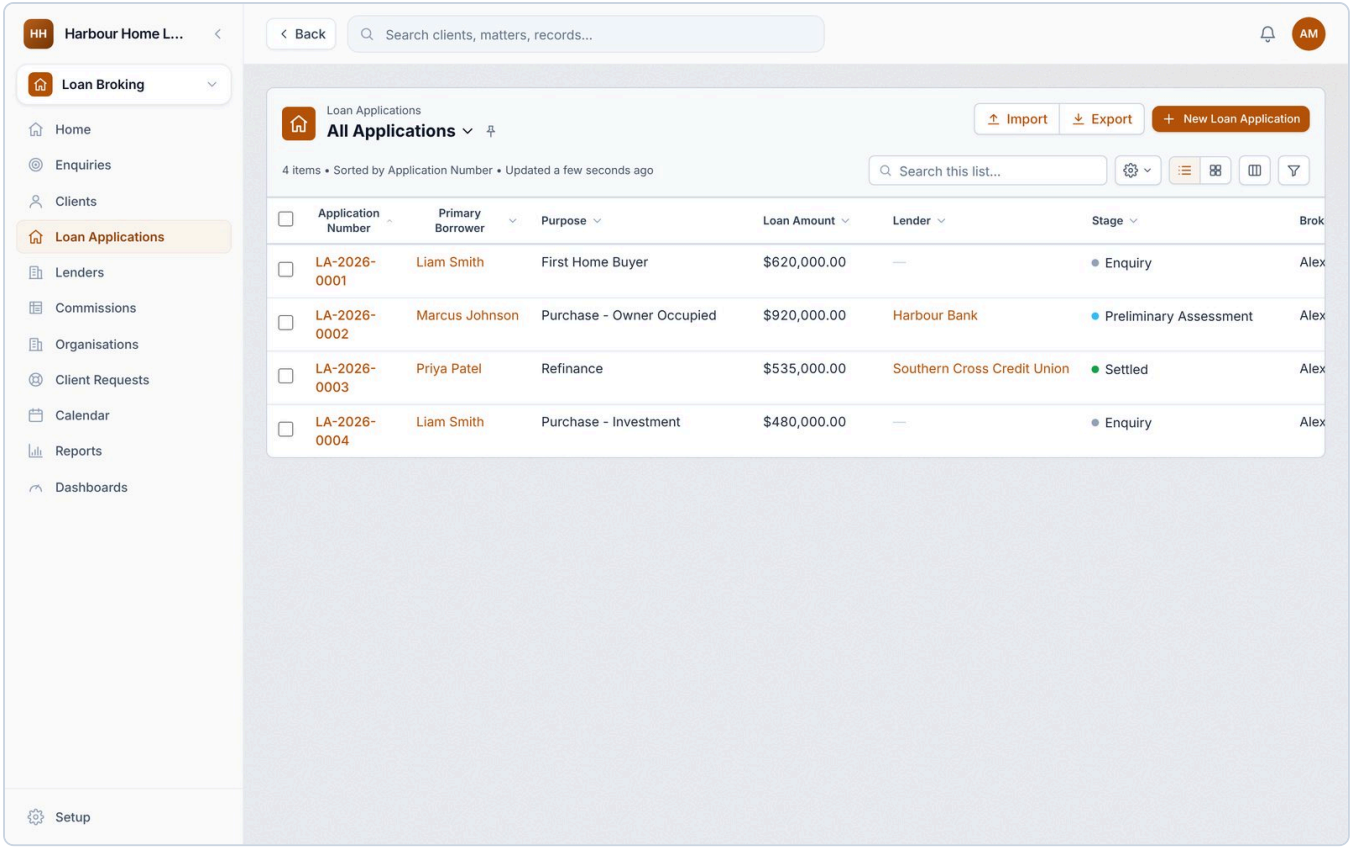

Figure 3: Loan Applications in table view.

List views

Click the list name (with the small arrow) to switch views:

- **All Applications:** every application in the workspace that you can see.
- **Active Pipeline:** everything not yet Settled or Declined.
- **My Pipeline:** your own applications that are still active.
- **Settling (30 days):** settlements due in the next 30 days.
- **Fixed Rates Expiring (90 days):** fixed rates ending in the next 90 days, so you can contact the client in time.

You can also create your own views with the gear menu, choose the columns, and filter the list.

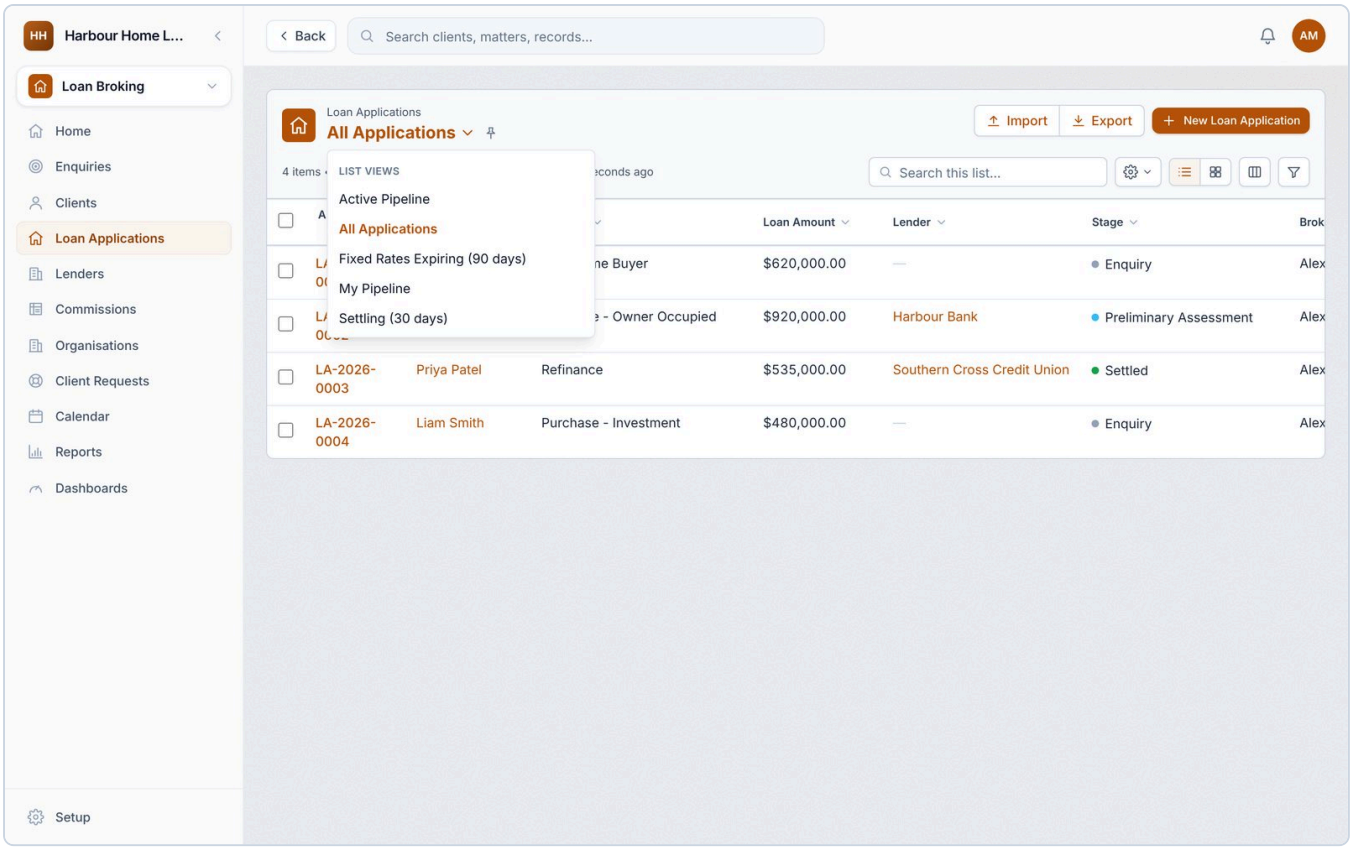

Figure 4: Switching between list views.

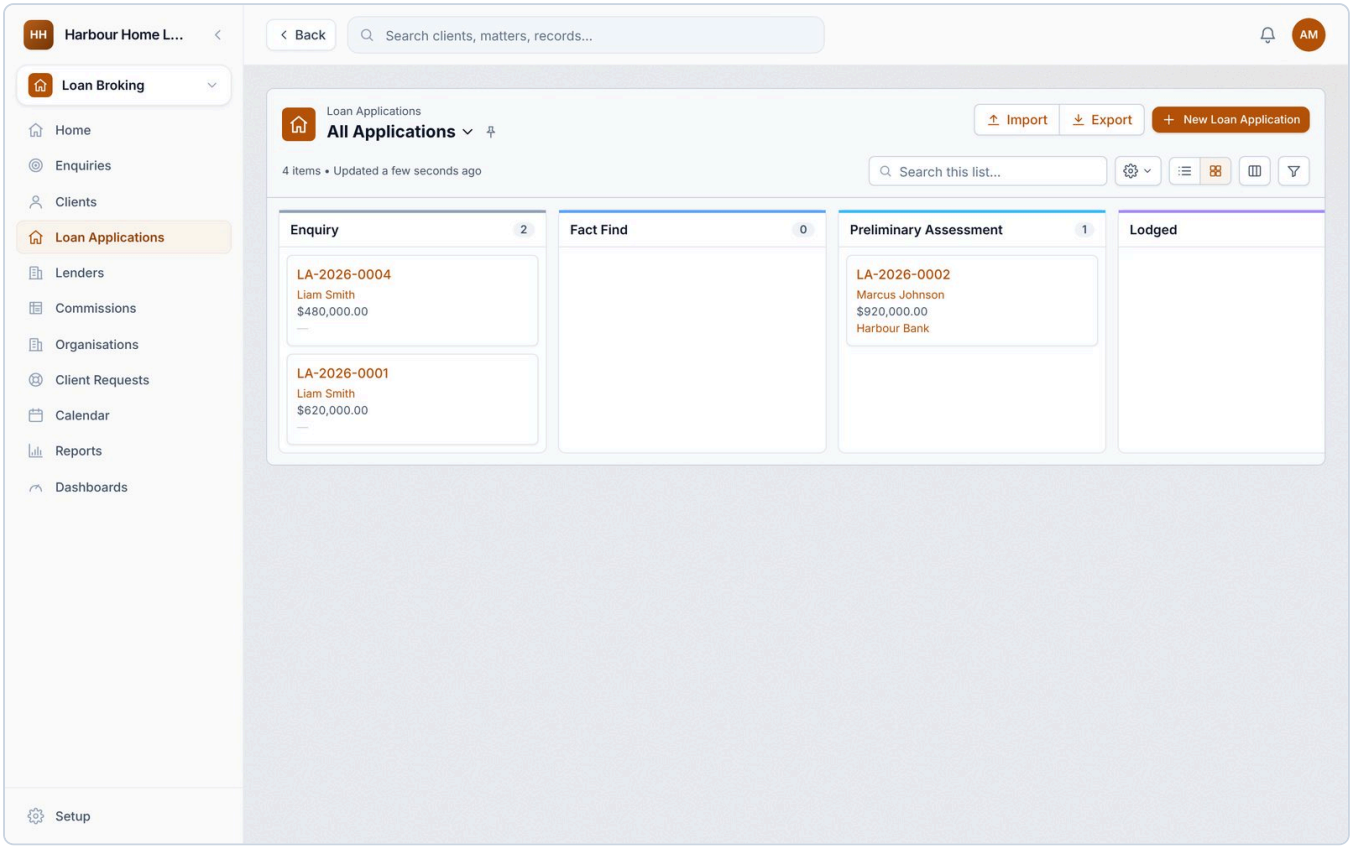

Figure 5: Board view, with one column per stage.

Step by step: creating a loan application

1. In **Loan Applications**, click **+ New Loan Application** (top right).
2. **Primary Borrower** (required): search for and choose the client. Add a **Co-borrower** if there is one.
3. **Purpose** (required): one of Purchase - Owner Occupied, Purchase - Investment, Refinance, Construction, Equity Release, First Home Buyer, Commercial, Car / Asset Finance or Personal.
4. **Broker:** leave it empty to make it you. Optionally choose the **Loan Processor**.
5. **Loan Amount** (required), for example $620,000.
6. **Security Value**, for example $780,000, and the **Security Property** address.
7. Optionally fill in the lender, product, interest rate, rate type, term and repayment type now, or later.
8. Click **Save**. The application gets the next number, such as **LA-2026-0001**, and starts at **Enquiry**. A new application can only start at Enquiry or Fact Find.

> **Calculated for you**
>
> The **LVR** is worked out from the loan amount and security value (for example, $620,000 ÷ $780,000 = 79.49%). **LMI Likely** is ticked when the LVR is over 80%. Both update whenever the figures change.

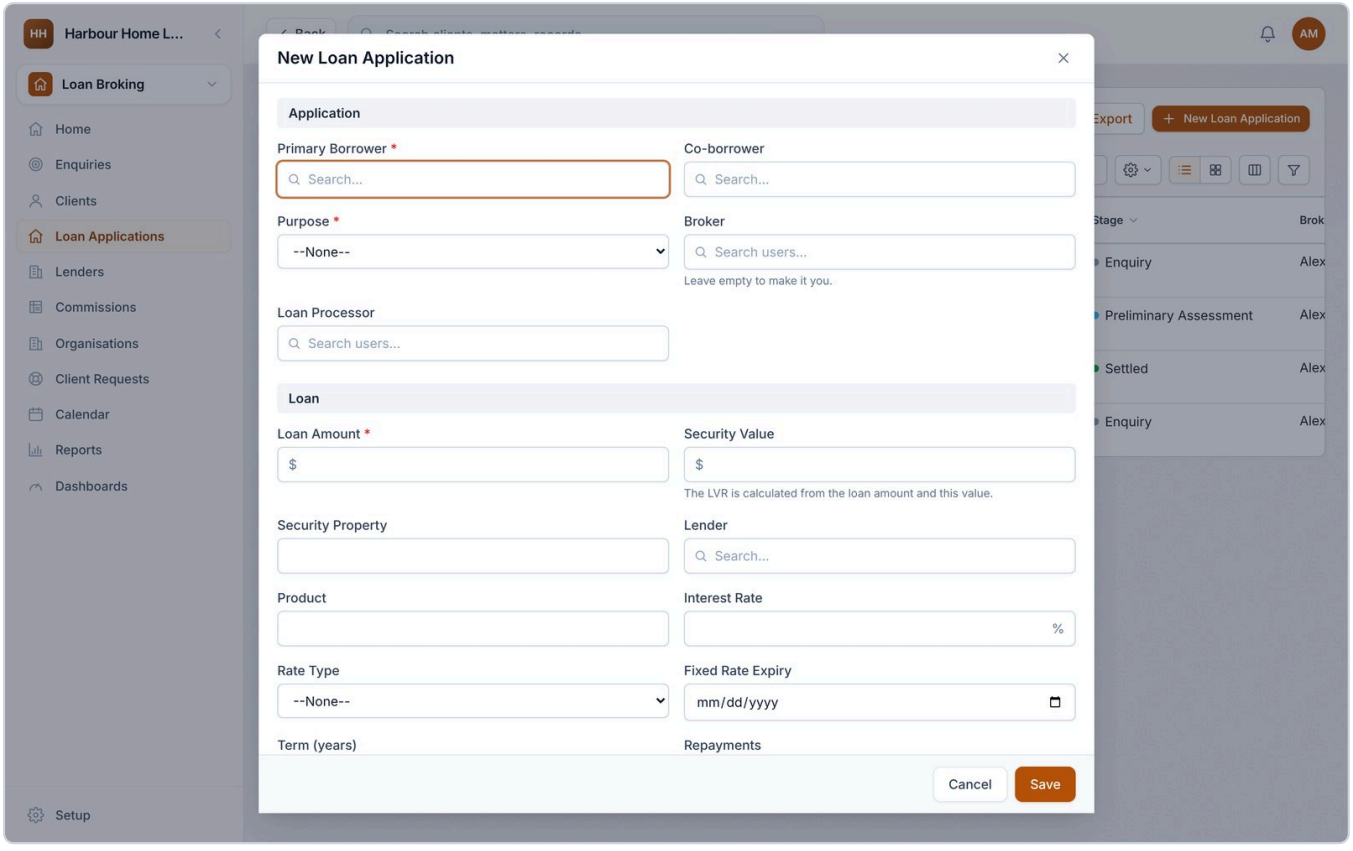

Figure 6: The New Loan Application form.

4. The Loan Stages & What Each One Needs

Every application moves through these stages:

1. Enquiry First contact	**2. Fact Find** Income, expenses, assets	**3. Preliminary Assessment** Needs the credit guide and privacy consent (and a credit quote if you charge a fee)	**4. Lodged** Needs the assessment and BID (current), a lender, the credit proposal disclosure and the Submit to Lender permission
5. Conditional Approval	**6. Valuation**	**7. Unconditional**	**8. Settlement**
9. Settled Needs a lender. Sets the settlement date and the next rate review; creates the expected upfront commission	**10. Declined** Needs a decline reason (also used for withdrawn applications)		

The stage path

Open an application to see its stage path below the header:

- **Next stage:** click **Mark Stage as Complete**.
- **Any other stage:** click the stage on the path, then **Mark as Current Stage**.
- **On a phone or tablet:** the path shows the current stage with a **Go to another stage** picker.

If something required is missing, the app says what it is and doesn't change the stage.

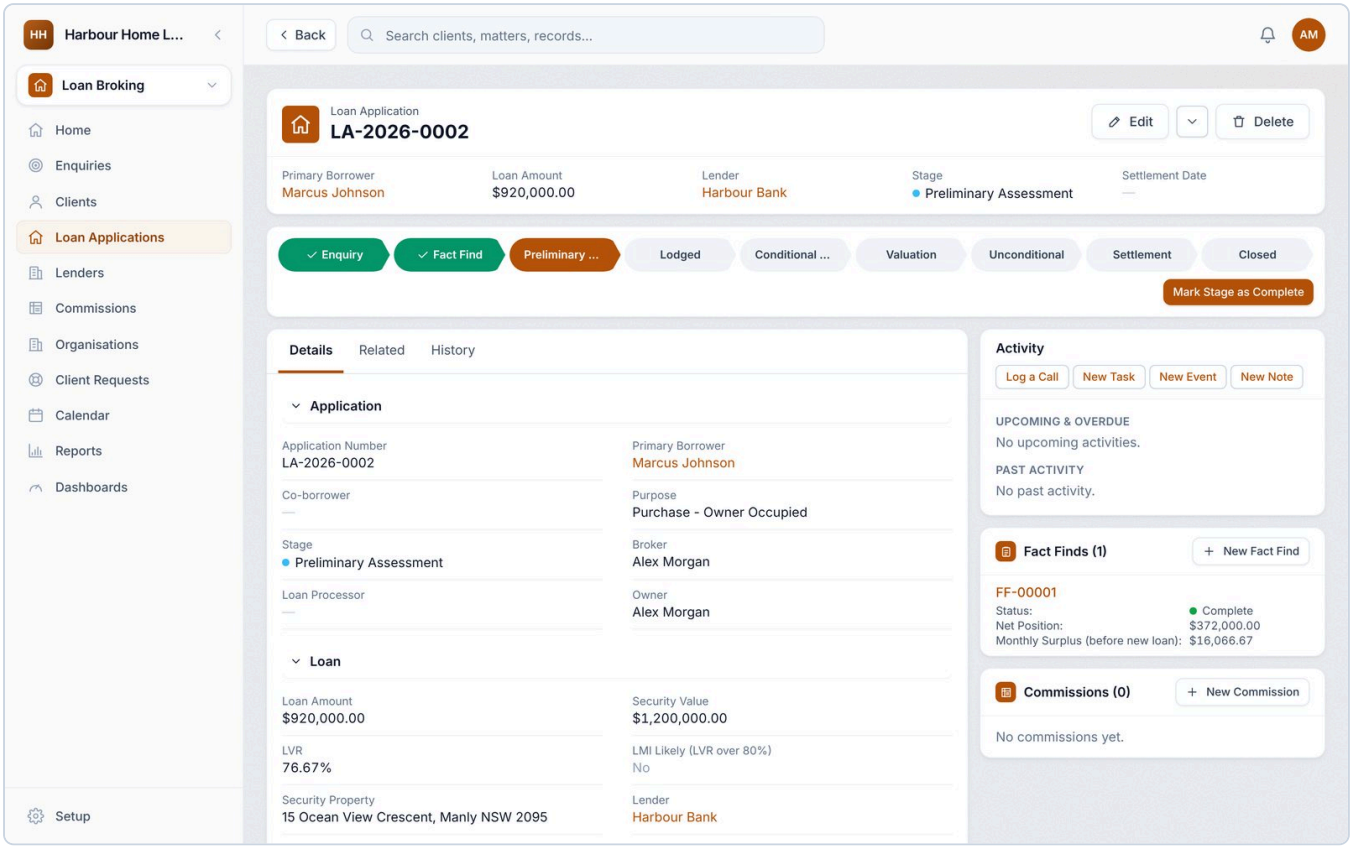

Figure 7: A loan application: header, stage path, details and the Activity panel.

What the app checks at each stage

Stage	What you do	What the app requires
1. Enquiry	First discussion of what the client needs	Nothing
2. Fact Find	Collect income, expenses, assets and liabilities (a fact find record)	Nothing
3. Preliminary Assessment	Assess the loan and record the BID	To move here or further: **Credit Guide Provided** and **Privacy / Credit Check Consent** dates; a **Credit Quote Given** date if **Broker Fee to Client** is more than $0 (NCCP s 114)
4. Lodged	Apply to the lender	A recorded **preliminary assessment and BID** that is still current; a **Lender**; the **Credit Proposal Disclosure Given** date (NCCP s 121); the **Submit to Lender** permission. Sets **Lodged With Lender** to today
5. Conditional Approval	Lender's approval in principle	Nothing (record the **Approval Expiry** date for reminders)
6. Valuation	Lender's valuation of the security	Nothing
7. Unconditional	Formal approval and loan documents	Nothing
8. Settlement	Settlement booked	Nothing (record the **Settlement Date** for reminders)
9. Settled	Loan drawn down	A **Lender**. Automatically: Settlement Date (today if empty), Next Rate Review (settlement + 365 days) and the expected upfront commission
10. Declined	Lender declined, or client withdrew	**Decline Reason**

Moving back to an earlier stage is always allowed. Once an application is **Settled** or **Declined**, only a Principal Broker can change its stage; anyone else opens a new application.

Step by step: preliminary assessment and Best Interests Duty

Under the NCCP Act and ASIC RG 273, you assess that the loan is not unsuitable and record why it's in the client's best interests. On the application:

1. Fill in the **Credit Compliance (NCCP)** dates: Credit Guide Provided and Privacy / Credit Check Consent. If you charge the client a fee, enter the **Broker Fee to Client** and the **Credit Quote Given** date.
2. Complete the three **Best Interests Duty** fields:
    - **Requirements and Objectives:** what the client wants and why.

- **Products Considered:** the products you compared and how.
- **Why This Product Is in the Client's Best Interests.**

3. Enter the product's **Interest Rate** and the **Term (years)**. The app works out the **Assessment Rate** (interest rate + the serviceability buffer, 3% by default) and the **Monthly Repayment at Assessment Rate**.
4. Make sure the application has a fact find with **Status = Complete** and **Expenses Verified** ticked (section 5).
5. Click **Record Preliminary Assessment**.

The app then checks that the monthly repayment at the assessment rate is no more than the client's **Monthly Surplus** on the latest completed fact find. If it isn't, the assessment stops with a message showing both figures. Otherwise it:

- ticks **Best Interests Duty Recorded**;
- sets **Preliminary Assessment Completed** to today;
- moves the application to Preliminary Assessment, if it was earlier;
- writes an entry in the audit log.

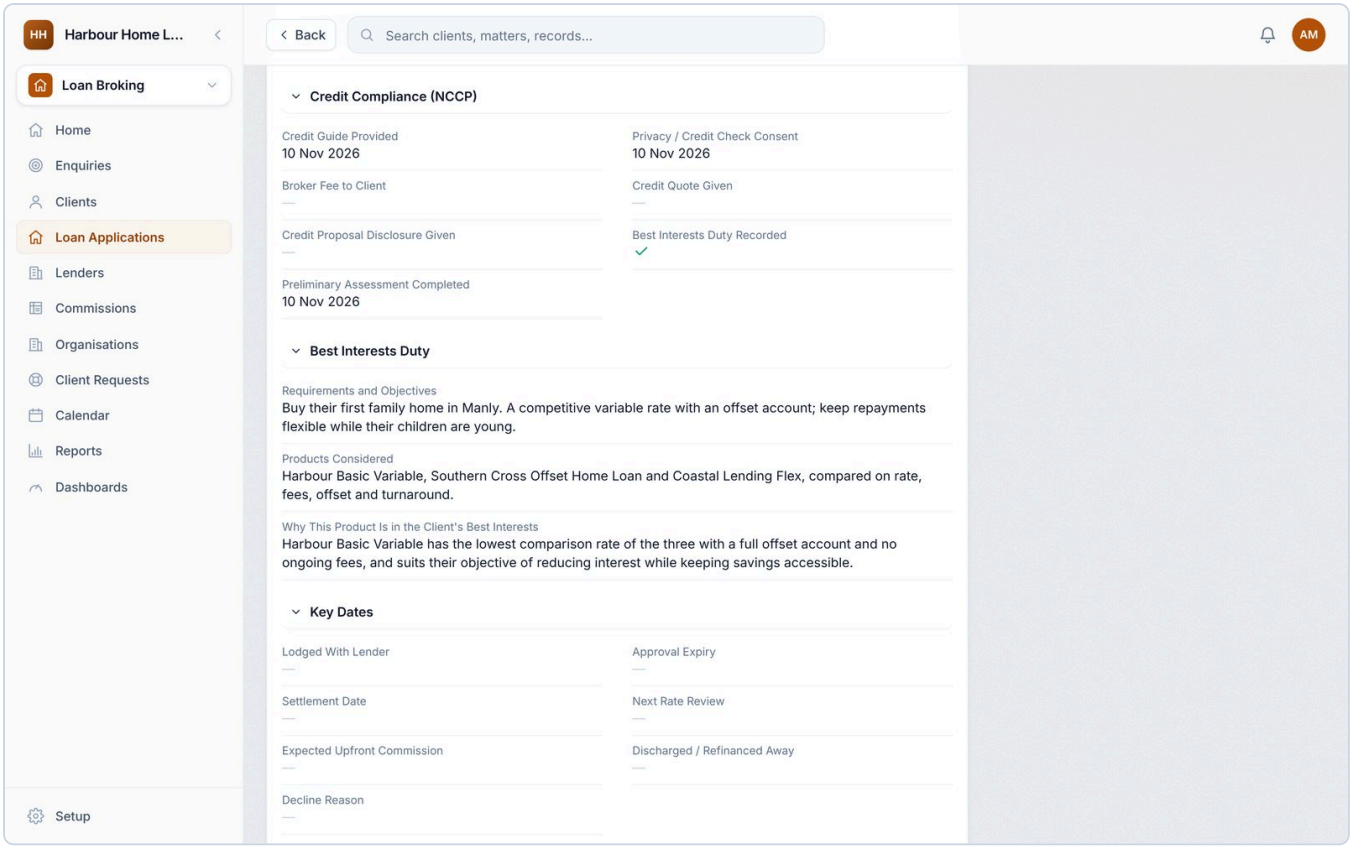

Figure 8: The Credit Compliance (NCCP) and Best Interests Duty sections after the assessment is recorded.

When the BID record locks, and when it's redone

- **Locked:**
  once the assessment is recorded, the three BID fields can't be edited.
- **Expired:**
  an assessment supports lodging for **90 days**, or **120 days** for a residential purchase (Purchase - Owner Occupied, Purchase - Investment or First Home Buyer). After that, lodging is refused, the BID fields unlock and **Record Preliminary Assessment** appears again.
- **Loan changed:**
  if the loan amount, purpose, borrower, co-borrower or lender changes before lodgement, the assessment is cleared and must be recorded again. The change is written to the audit log.

---

5. Client Fact Find & Serviceability

The fact find records the client's financial position. Add one from the application's **Related** tab (**+ New Fact Find**). Its number looks like **FF-00001**.

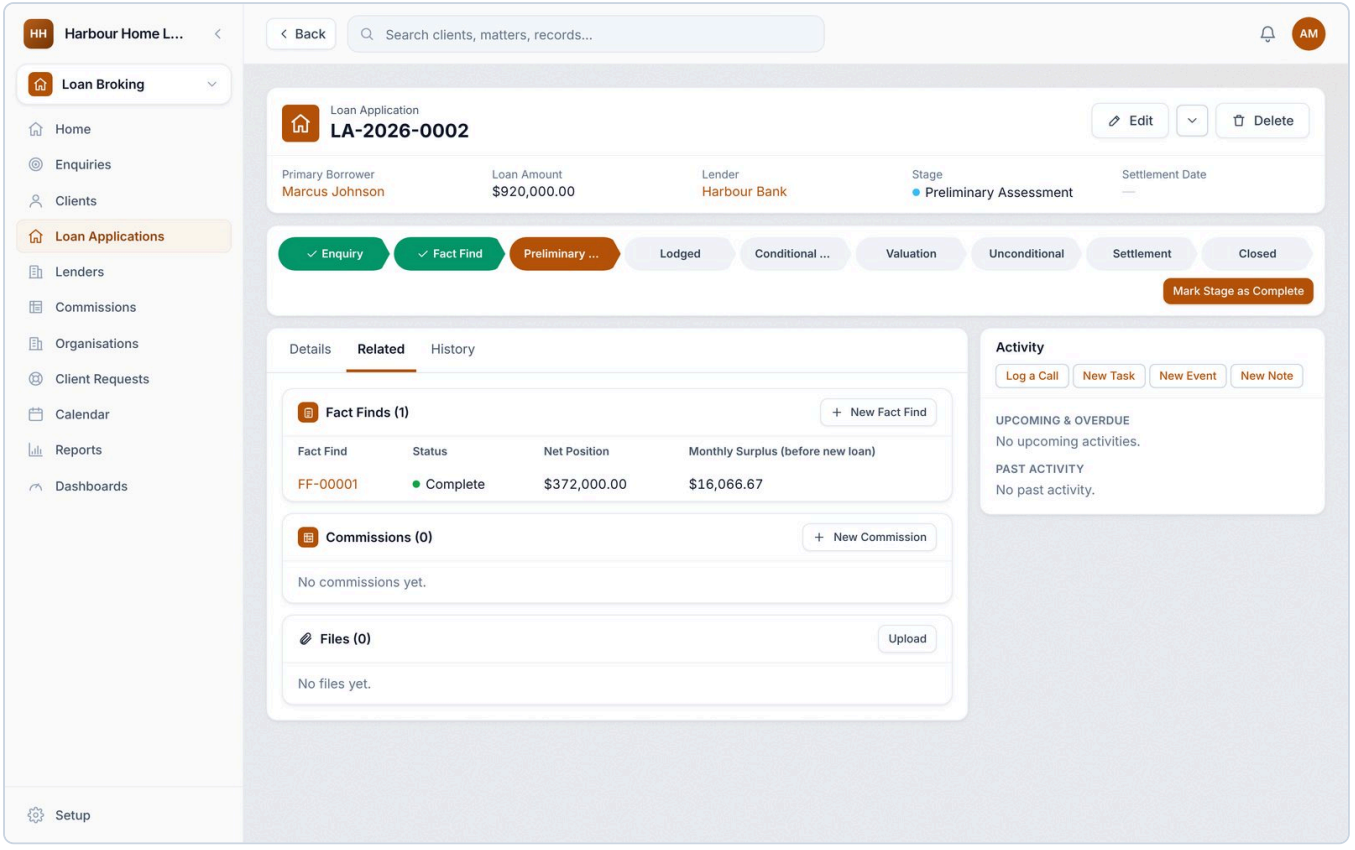

Figure 9: The Related tab of a loan application: Fact Finds, Commissions and Files.

What a fact find holds

- **Fact Find:** Status (Draft or Complete), Employment, Dependants and **Expenses Verified (bank statements)**.

- **Income and Expenses:** Gross Annual Income, Other Annual Income, Monthly Living Expenses and Monthly Loan / Card Repayments.
- **Assets and Liabilities:** Total Assets and Total Liabilities.

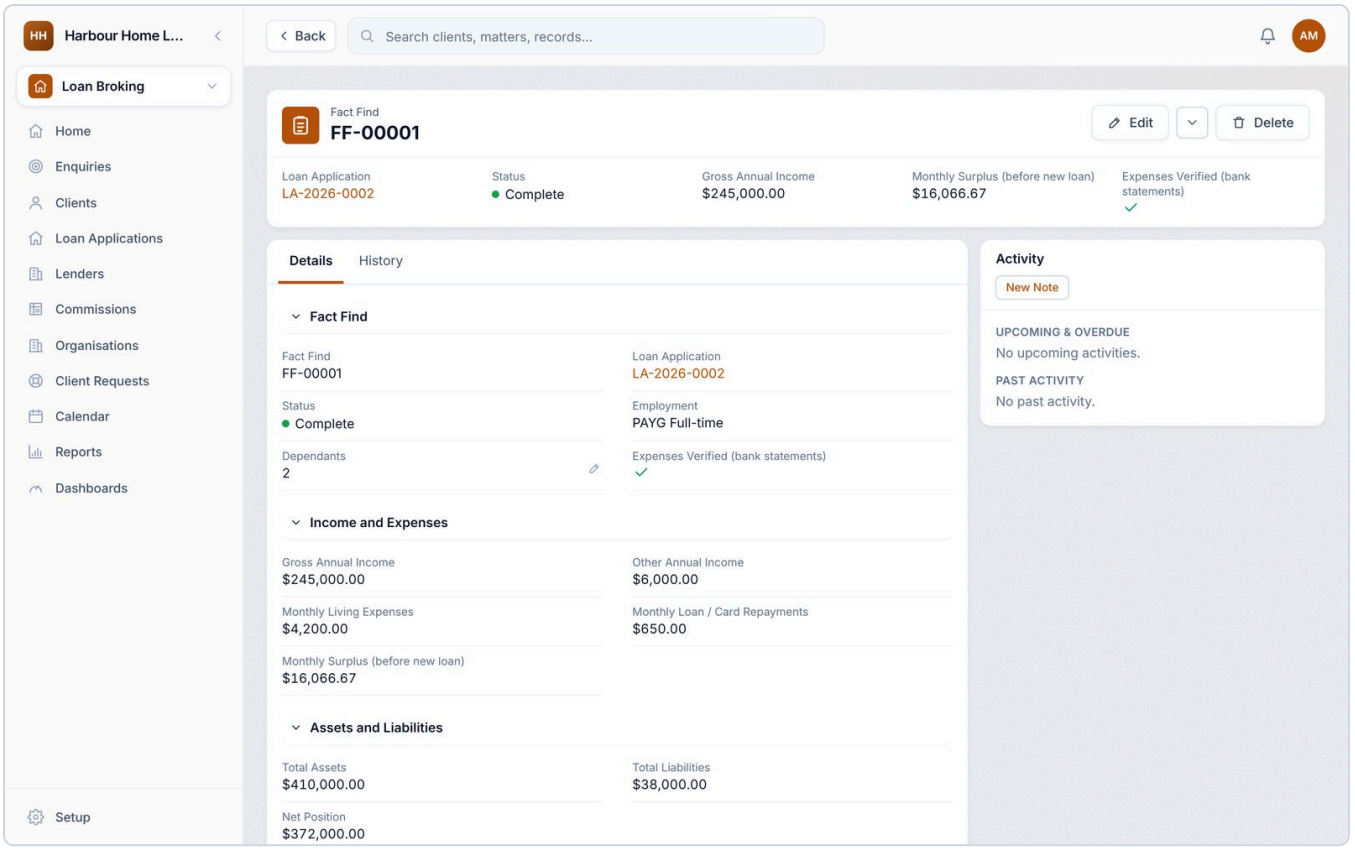

Figure 10: A completed fact find with its calculated Monthly Surplus and Net Position.

How the app calculates

- **Monthly Surplus (before new loan)** = (Gross Annual Income + Other Annual Income) ÷ 12 − Monthly Living Expenses − Monthly Loan / Card Repayments.
- **Net Position** = Total Assets − Total Liabilities.
- **Assessment Rate** = the application's interest rate + the serviceability buffer. The buffer is 3.00% by default, following APRA's guidance. An optional minimum assessment rate can also apply. Both are set in Setup → Practice Settings.
- **Monthly Repayment at Assessment Rate** = principal and interest over the loan term at the assessment rate.

A fact find can't be marked Complete without income and living expenses. The app uses the figures you enter: it doesn't apply a living-expense benchmark such as HEM, so check declared expenses against the client's statements before ticking Expenses Verified. If the new loan replaces an existing debt (a refinance), remove that repayment from Monthly Loan / Card Repayments.

6. The Lender Panel

Lenders holds your panel. The **Lender Panel** view shows the lenders marked **On Panel**; switch to **All Lenders** to see every lender.

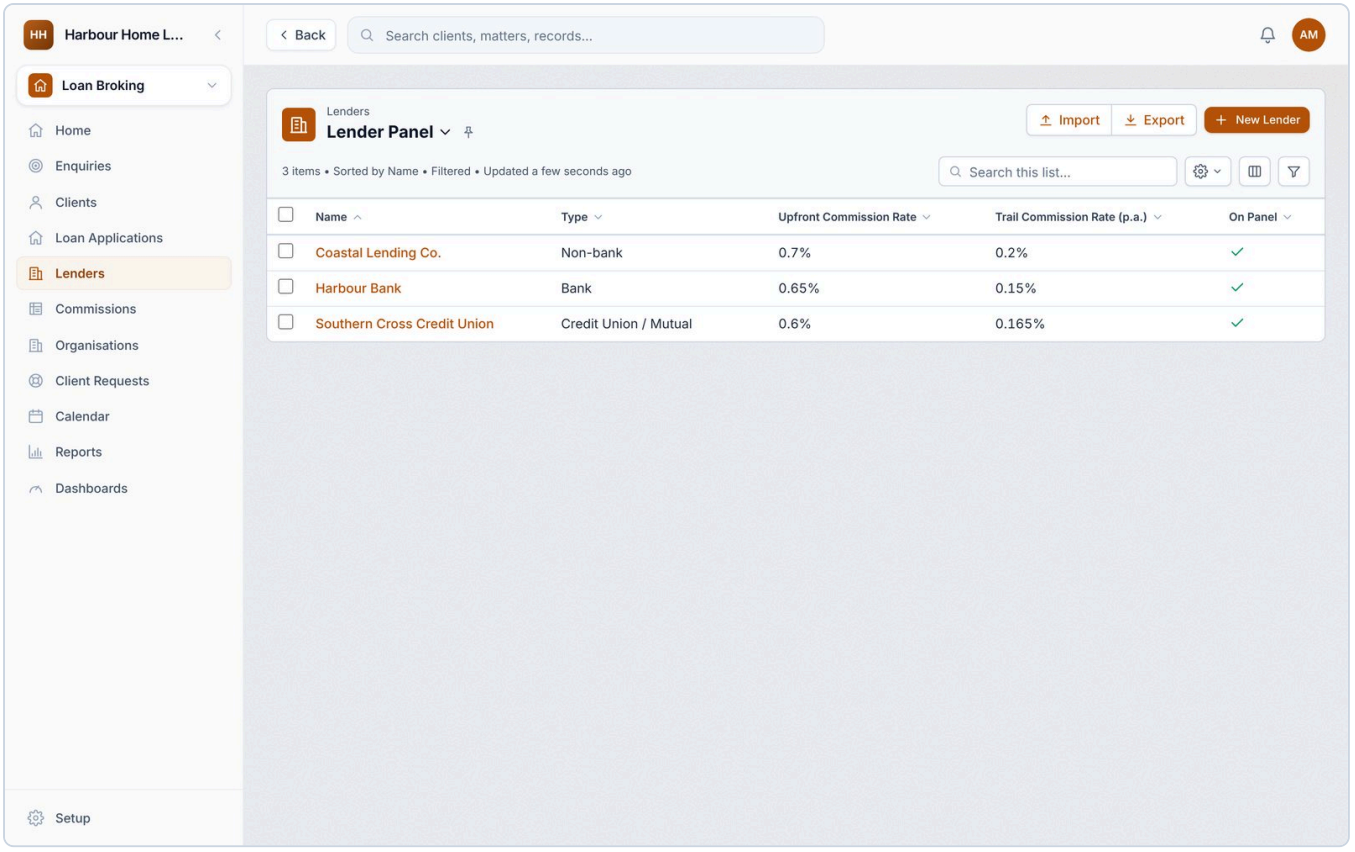

Figure 11: The lender panel: type, upfront and trail rates, and On Panel.

A lender's details

- **Lender:** Name; Type (Major Bank, Bank, Non-bank, Credit Union / Mutual or Private); Accreditation / Broker ID; On Panel.
- **Commission:** Upfront Commission Rate (%), Trail Commission Rate (% a year), Clawback Period (months) and Clawback Halves After (months).
- **Relationship:** BDM name, e-mail and phone; Notes.

Enter the rates and clawback terms from **your** agreement with each lender; the app uses them to calculate commissions and clawbacks. The **Loan Applications** list on a lender shows every application with that lender.

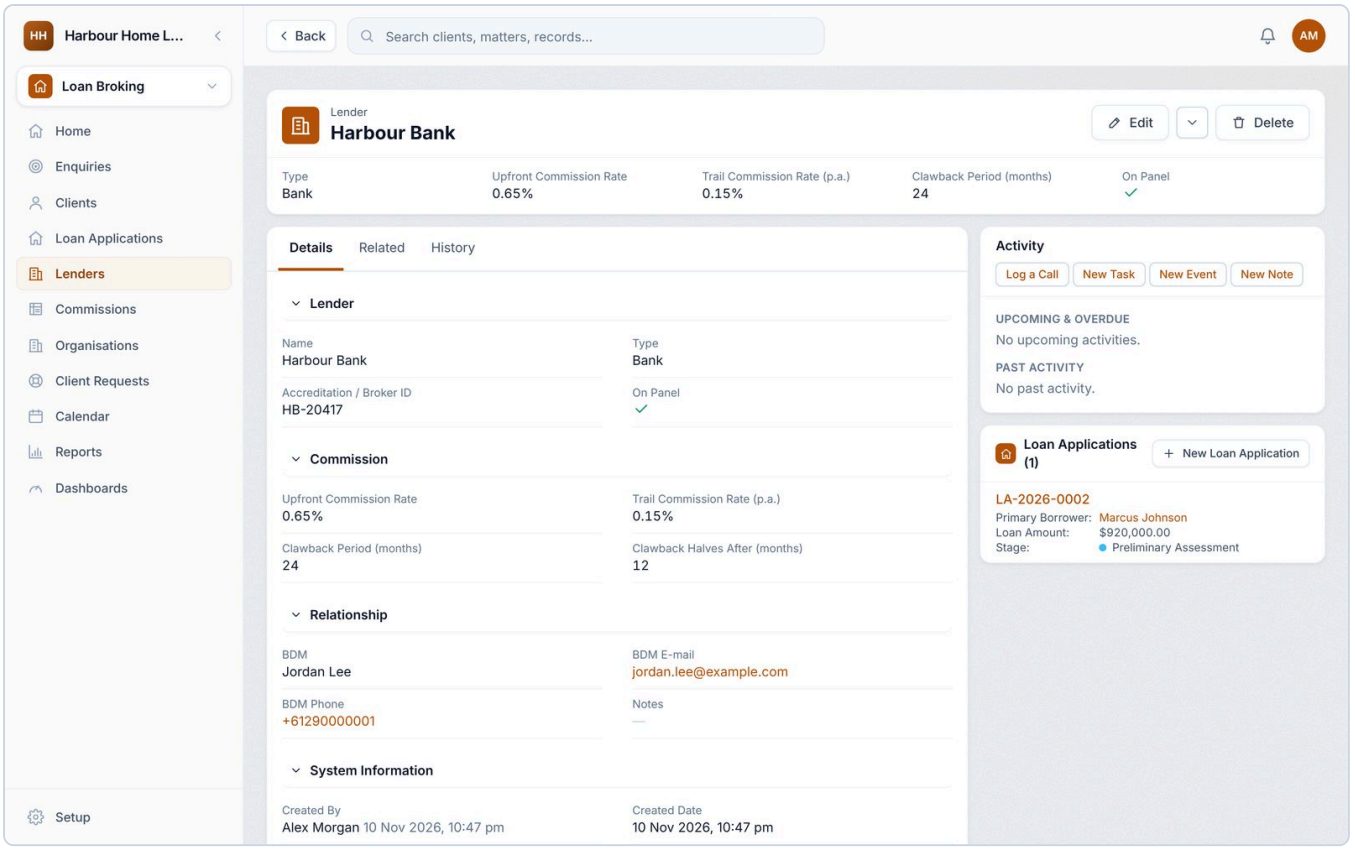

Figure 12: A lender's commission rates, clawback terms and BDM details.

Clients who use the client portal can see the name of their loan's lender, but never your commission rates, clawback terms, accreditation number or BDM details.

---

7. Commissions & Clawbacks

The **Commissions** tab is the commission ledger. Each entry has a number like **COM-000001**, and these fields:

- **Loan Application** (the lender and broker are filled in from it);
- **Type:** Upfront, Trail or Clawback;
- **Amount** and **Ledger Amount**, which is negative for a clawback;
- **Statement Period**, and **Status**: Expected or Received;
- **Received** date and **Statement Reference**.

The **Expected Commissions** view lists what you are still waiting for.

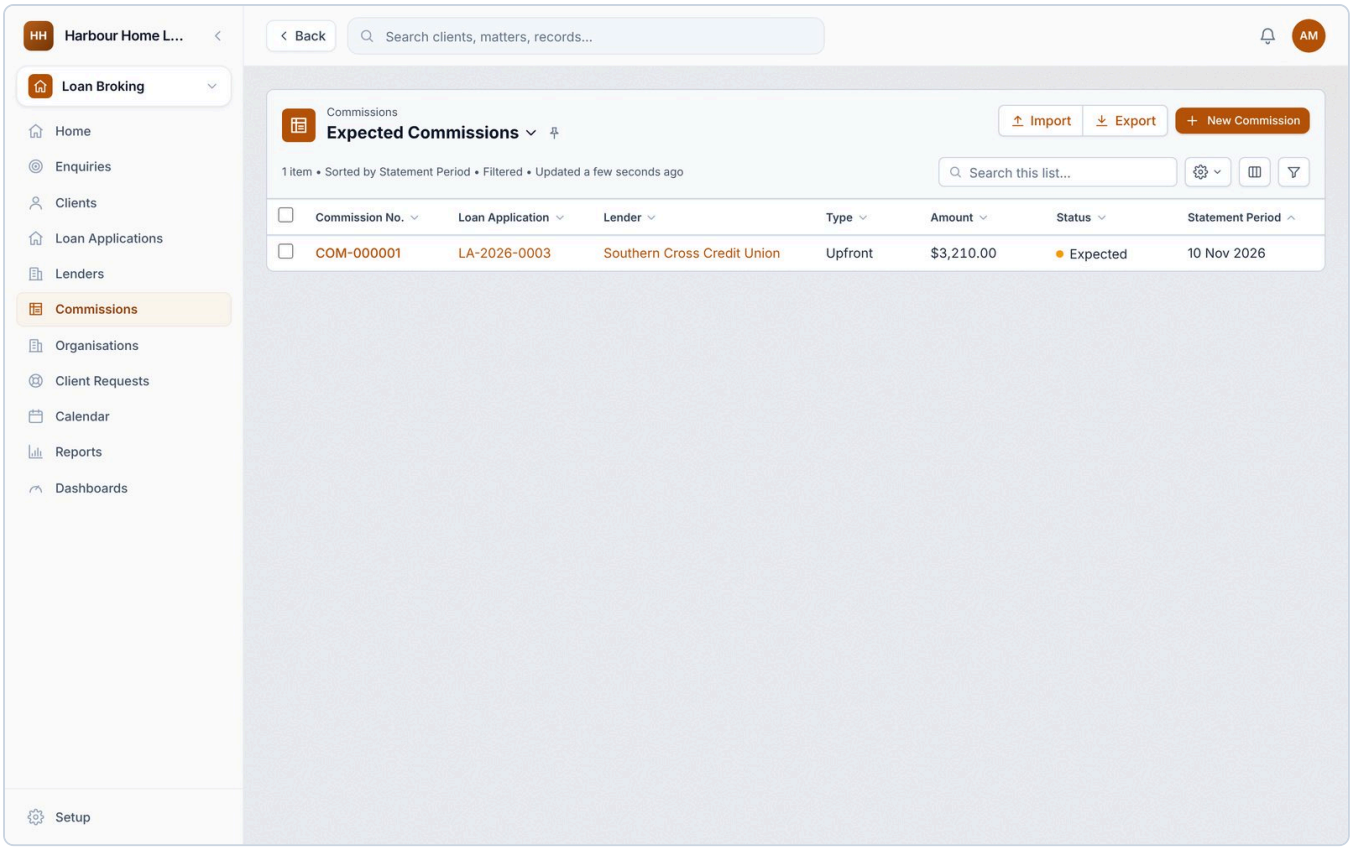

Figure 13: Expected Commissions, with an upfront commission created at settlement.

What happens automatically

- **At settlement:** when an application moves to Settled, an **Upfront** commission is created with status **Expected**:
  - **Amount:** Loan Amount × the lender's Upfront Commission Rate. For example, $535,000 × 0.60% = $3,210.
  - **Statement Period:** the settlement date.
  - **On the application:** the Expected Upfront Commission field shows the same amount.

  Only one upfront entry is created per application.
- **Discharge or refinance away:** on a settled application, click **Record Discharge** and enter the discharge date (today by default).
  - **Inside the clawback period:** if the loan ends within the lender's Clawback Period, an **Expected Clawback** of the upfront commission is recorded. It's the full amount, or half once the lender's *Clawback Halves After* point has passed. Its Ledger Amount is negative.
  - **After the clawback period:** no clawback is recorded.

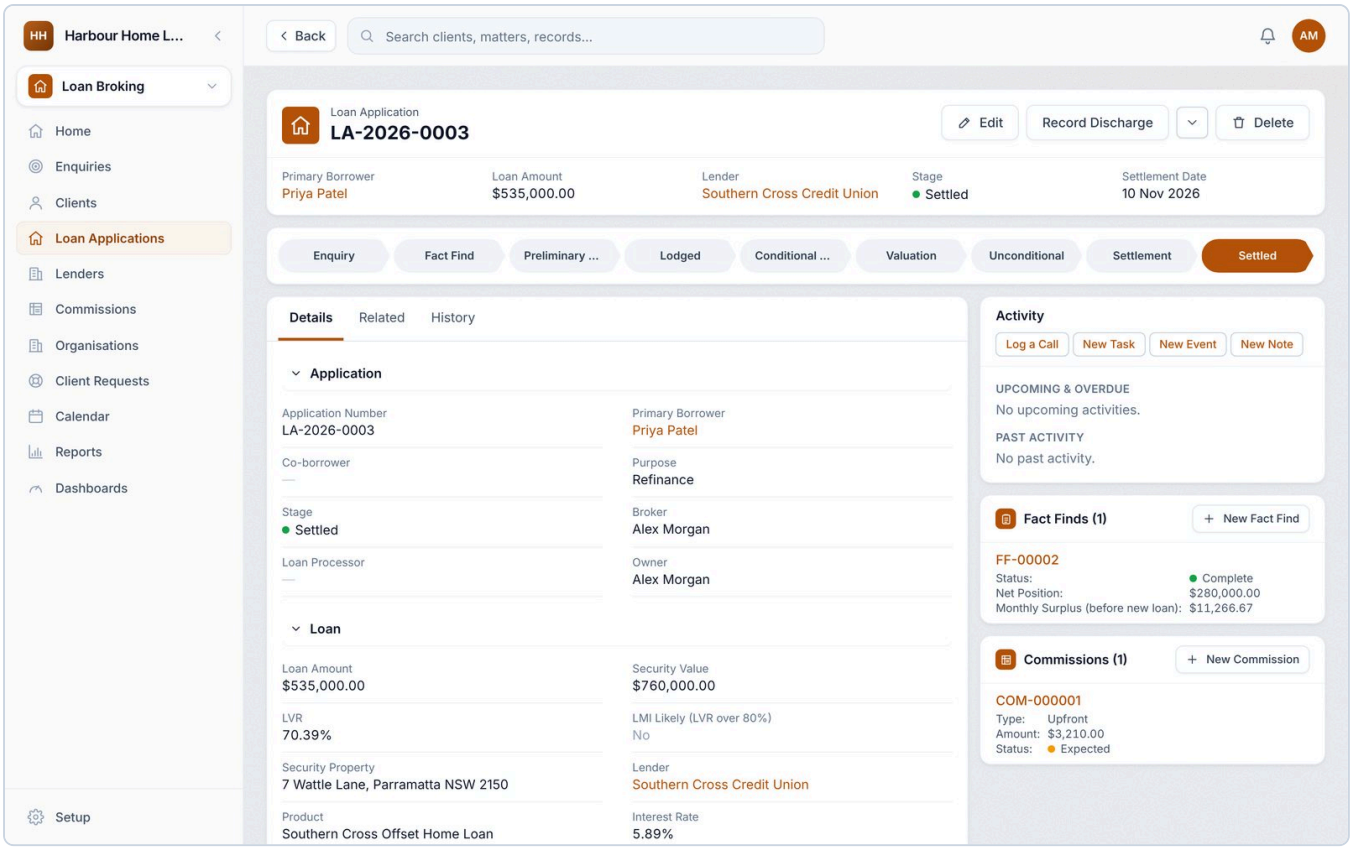

Figure 14: A settled application, with Record Discharge in the header and its commission under Related.

Recording commission from lender statements

Trail commission isn't created automatically. Record each payment from the lender's statement with **+ New Commission** (Type: Trail). When an expected amount arrives, set its Status to **Received**; the Received date fills in automatically.

- **Who can record or change commission:** only people with **Manage Commissions** (Principal Broker and Commissions Administrator).
- **Brokers:** they can see the commission on their own loans.
- **Corrections:** once recorded, the loan, type and amount of an entry can't be changed. Record a clawback or a new entry instead, so the ledger keeps a full history.

---

8. Clients (Borrowers)

A client's record has a **Borrower Details** section:

- **Date of Birth**;
- **Residency Status:** Australian Citizen, Permanent Resident, Temporary Visa or Non-resident;
- **First Home Buyer**;
- **ID Verified (100 points):** tick it once you've sighted and checked enough identity documents to total 100 points. The app records when it was ticked and by whom, but doesn't add up the points for you.

- **Driver Licence Number:** stored encrypted, and visible only to Principal Brokers, Brokers, Loan Processors and administrators.

The client's contact details include **Mobile Number** and **Landline / Office Phone**. Their record lists their loan applications, both as primary borrower and as co-borrower.

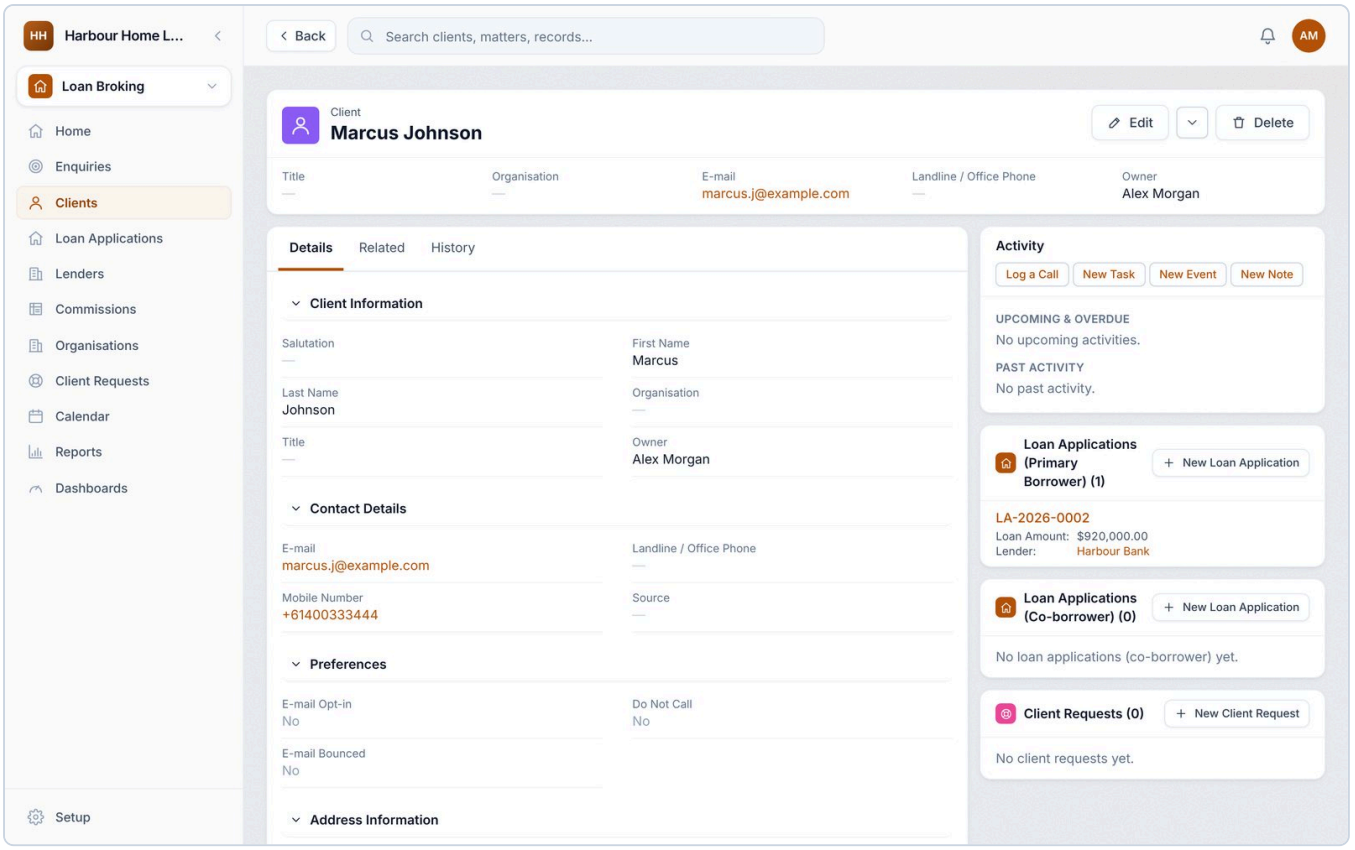

Figure 15: A client record with their loan applications.

The client portal

Give a client portal access from their record: open the ▾ menu next to Edit and choose **Invite to Client Portal**. In the portal, clients can:

- **See their loan applications:** stage, amount and lender. Broker, processor, commission and internal fields stay hidden.
- **Send requests:** these appear under **Client Requests** and notify the firm.

---

9. Reports & Dashboards

Broking Dashboard

The **Broking Dashboard** (Dashboards tab; its charts also appear on Home) shows:

- **Pipeline by stage**
- **Net commission by type**
- **Settled by lender**
- **Broker volume**

- **Upcoming settlements**

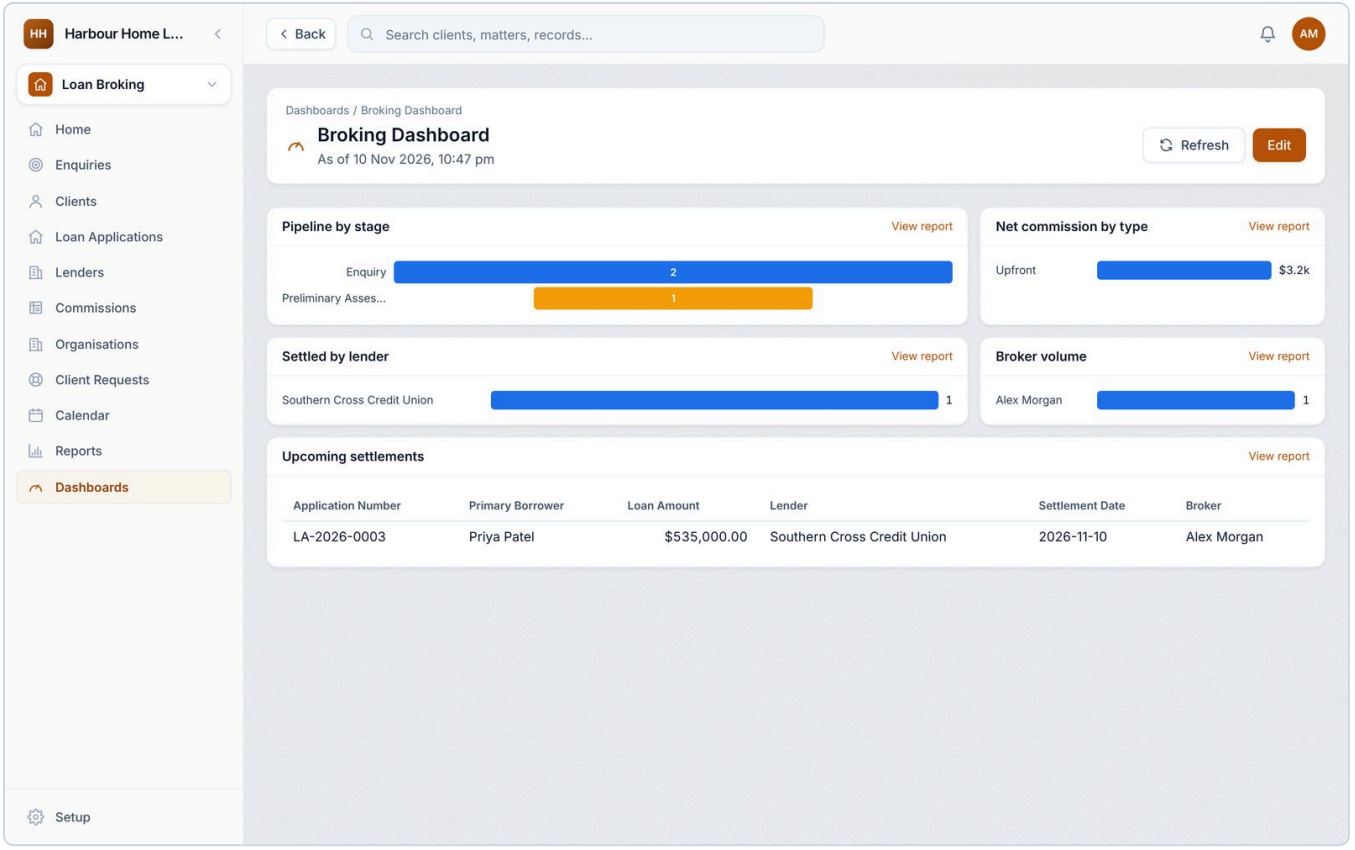

Figure 16: The Broking Dashboard.

Loan Broking Reports

The **Loan Broking Reports** folder (Reports tab) contains:

Report	What it shows
Pipeline by Stage	Active applications by stage: total loan amount and count
Settled Volume by Lender	Settled loans by lender: total loan amount and count
Broker Volume (this year)	Loans settled this year, by broker
Commission by Type	Number and net ledger amount of upfront, trail and clawback entries
Commission Ledger by Lender	Net commission by lender
Upcoming Settlements	Settlements in the next 30 days
Fixed Rate Expiries	Fixed rates ending in the next 90 days

Open a report to see its chart and totals; use **Export** to download it, or **Subscribe** to have it e-mailed on a schedule. **+ New Report** builds your own.

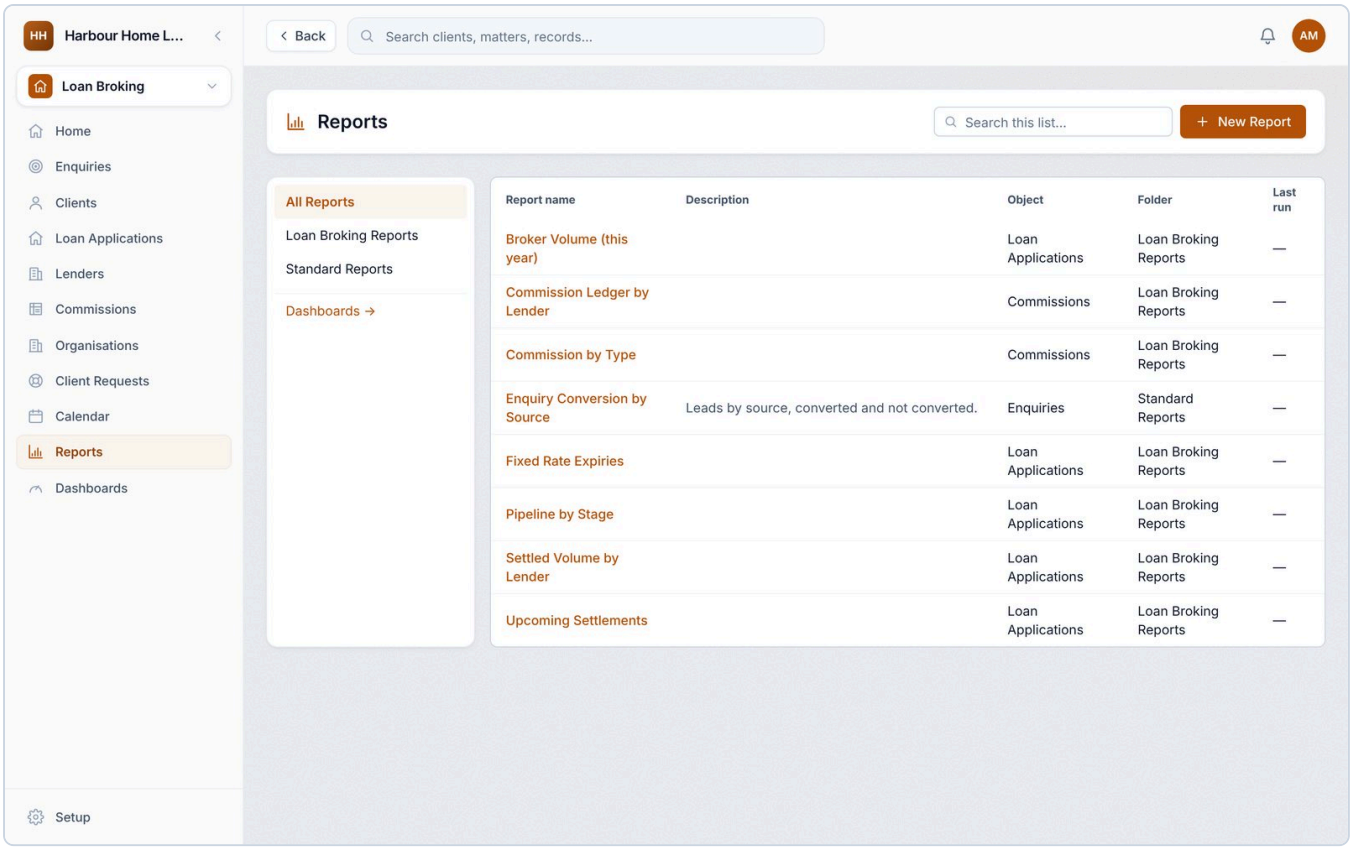

Figure 17: The Reports list.

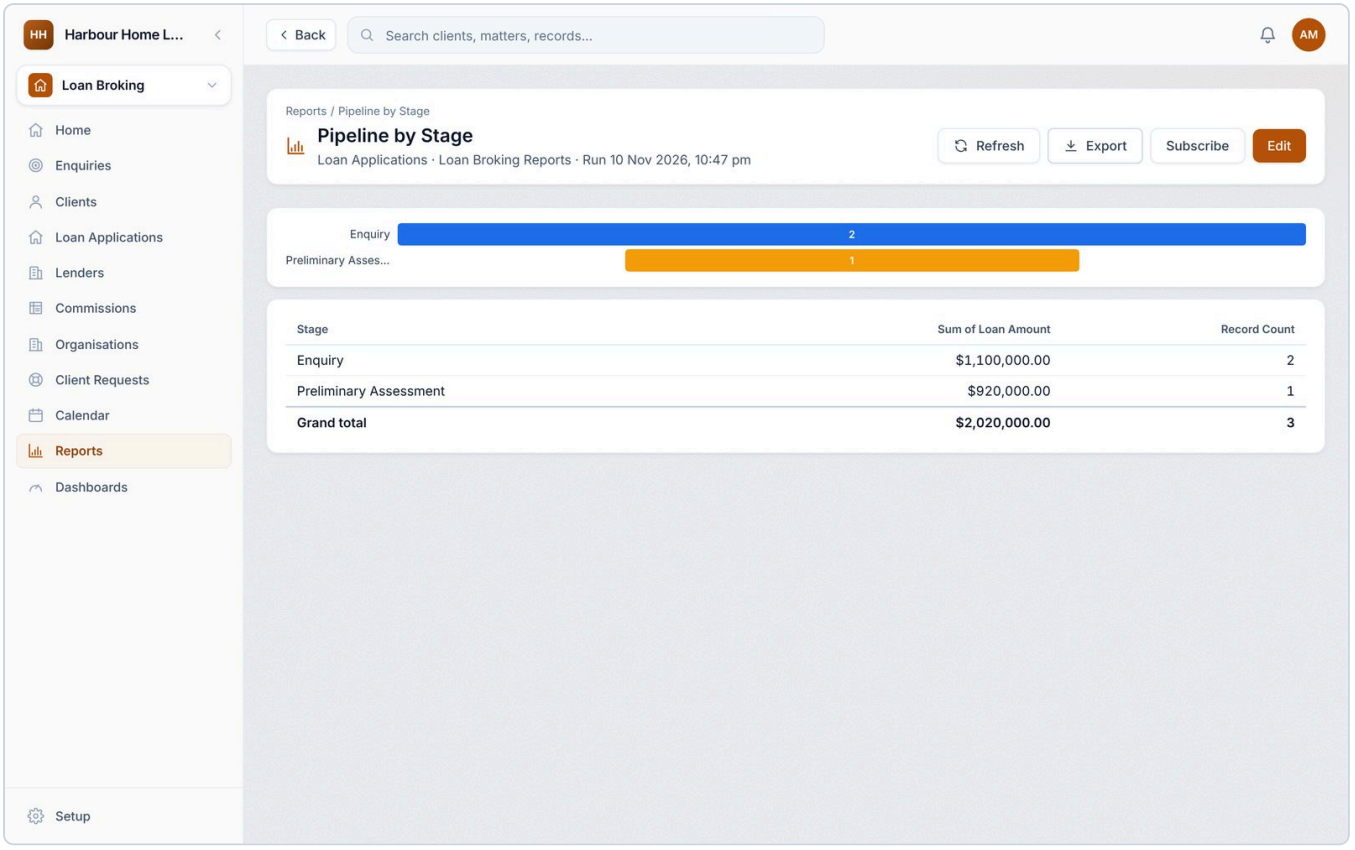

Figure 18: The Pipeline by Stage report.

10. Reminders & Practice Settings

Each day the app sends the application's broker a notification (the bell icon) ahead of these dates:

Date on the application	Reminders by default	Stops when
Settlement Date	7 and 1 days before	Settled or Declined
Approval Expiry	14 days before	Settled or Declined
Fixed Rate Expiry	90 and 30 days before	Declined or discharged
Next Rate Review	7 days before	Declined or discharged

An administrator can change these in **Setup → Practice Settings → Loan Broker (Australia)**, along with:

- the **serviceability buffer** (3% by default);
- the **minimum assessment rate** (0 = none);
- how long assessments and BID records are kept (**7 years**).

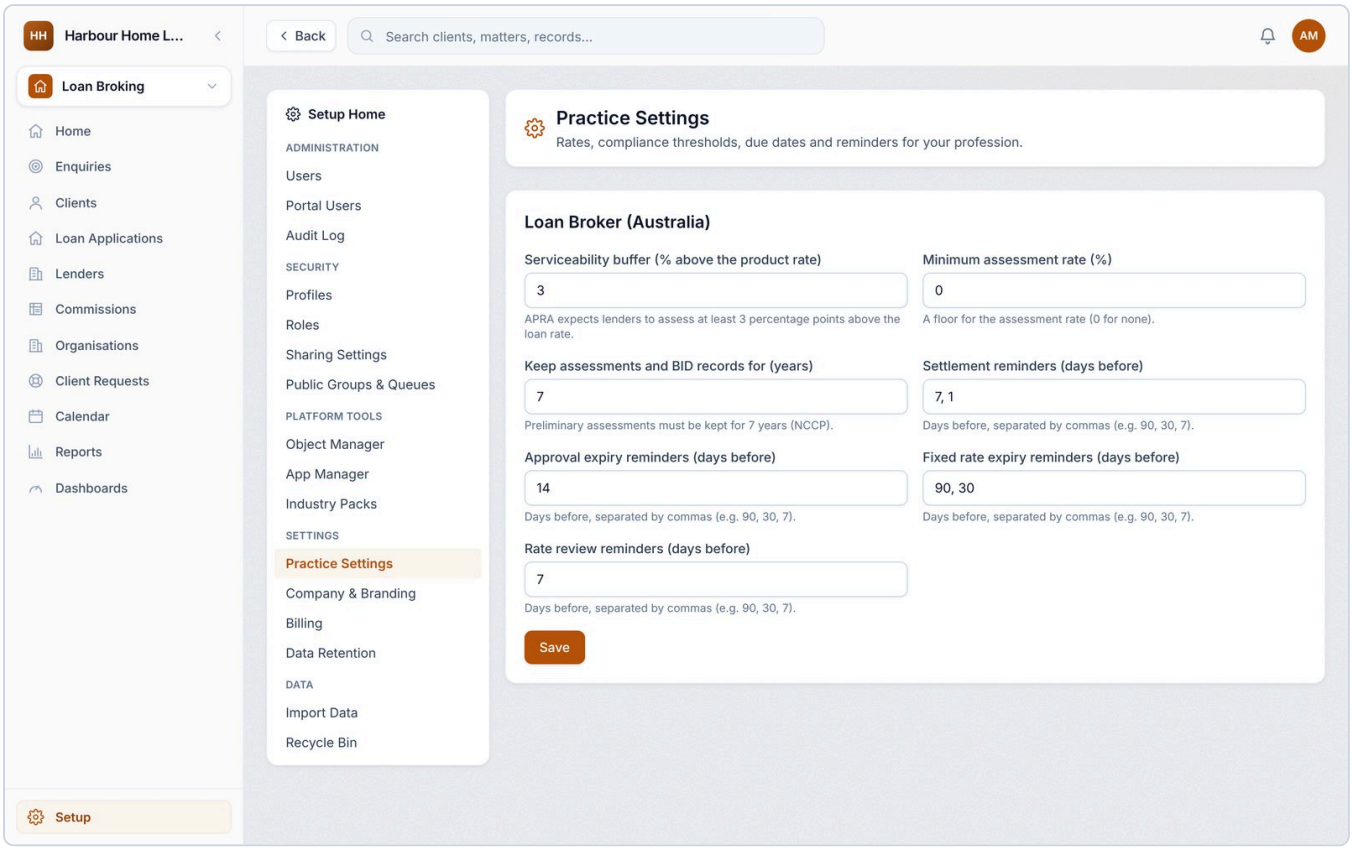

Figure 19: Practice Settings for loan broking.

11. Record Keeping & Audit

- **Retention:** an application with a preliminary assessment can't be deleted until 7 years after the assessment (the period is set in Practice Settings). Mark it **Declined** (with a reason) instead.

- **History:** the **History** tab on an application shows every change to key fields (stage, borrower, amount, lender, broker, compliance dates and settlement date), with who made it and when.
- **Audit log: Setup → Audit Log** records sign-ins, record changes, assessments, exports and other actions, with the user, time and IP address.

---

12. Frequently Asked Questions

Q1: Why can't I move a loan from Fact Find to Preliminary Assessment?
Fill in **Credit Guide Provided** and **Privacy / Credit Check Consent** in the Credit Compliance (NCCP) section. If **Broker Fee to Client** is more than $0, also fill in **Credit Quote Given**.

Q2: Why did Record Preliminary Assessment fail?
The message tells you which check failed. It's one of these:

- the three BID fields are empty;
- the credit guide or privacy consent date is missing;
- there's no completed fact find;
- Expenses Verified isn't ticked;
- the interest rate or term is missing;
- the repayment at the assessment rate is more than the client's monthly surplus.

For the last one, review the loan amount or term, or the debts on the fact find.

Q3: Why can't I lodge the application?
Lodging needs a recorded assessment that is still current (90 days, or 120 for a residential purchase), a lender, the Credit Proposal Disclosure Given date and the **Submit to Lender** permission. Loan Processors don't have that permission, so a broker or principal lodges.

Q4: Can I edit the BID fields after recording the assessment?
No; they're locked so the record can be relied on in an audit. They unlock only when the assessment has expired, or when the loan details change before lodgement and the assessment must be recorded again.

Q5: How do I record a clawback when a client refinances away?
Open the settled application and click **Record Discharge**. If the discharge falls within the lender's clawback period, the expected clawback is added to the commission ledger automatically.

Q6: Can I delete an old application?
Not within 7 years of its preliminary assessment. Mark it Declined, with the reason, instead. Applications that were never assessed can be deleted (they go to the Recycle Bin for 30 days).

13. Best Practice Summary

Phase	Best practice
Client intake	Verify identity (tick ID Verified) and give the credit guide and privacy consent before discussing products. Record a credit quote first if you charge a fee.
Fact find	Verify income and living expenses against payslips and bank statements before ticking Expenses Verified and marking the fact find Complete.
Preliminary assessment	Write the three BID fields in specific terms and check serviceability at the assessment rate before recording.
Lodgement	Lodge within 90 days of the assessment (120 for a residential purchase) and give the credit proposal disclosure first.
Settlement and revenue	Record the settlement and approval-expiry dates for reminders, check the expected upfront commission, and reconcile trail and clawbacks against lender statements.
